Books That Speak for and to the Majority

- **The Dispossessed Majority** by Wilmot Robertson. No one who reads this all-encompassing study of the American predicament will ever again view his country in the same light. The author brilliantly recounts the tragedy of a great people, the Americans of Northern European descent, who founded and built the U.S. and whose decline is the chief cause of America’s decline. Although replete with cogent criticism of the people and events which have brought America low, the book ends on a positive, optimistic note, which envisions a resurgent American Majority liberating its institutions from the control of intolerant intellectuals innately programmed to destroy what they could never create. Over 100,000 copies sold. Updated, expanded edition; 613 pages, index, bibliography, 1,000 footnotes. Hardcover, $25; softcover, $10. Condensed paperback Popular Edition, 364 pages, no scholarly frills, $3.95.

- **Ventilations** by Wilmot Robertson. The author of *The Dispossessed Majority* firms up and expands some of his key ideas. In 14 probing essays he answers his critics, comments on Watergate, Russian anti-Semitism, women’s liberation, foreign affairs, and tells why Majority members how they can best oppose the reverse discrimination that is making them second-class citizens. Also included is a blow-by-blow description of the attempted suppression of *The Dispossessed Majority* by the media establishment. The last two essays propose both a moral and practical solution to the ethnic dilemma by transforming the U.S. into a racial confederation. Softcover, 115 pages, $4.95.

- **Race and Reason** and **Race and Reality** by Carleton Putnam. In response to the black power agitations of the 50s and 60s came two searching, scholarly, objective, fast-word studies of the equilibrarian movement. When everyone else was silent, Carleton Putnam -- lawyer, airline executive and historian -- spoke out. In reasoned, crystalline prose he methodically demolishes almost every point, argument and cliche in the liberal-minority ideological handbook, warning us in advance of the affirmative action programs that were bound to follow. Softcover, both books for $8.50 (total 317 pages), $5 separately.

- **Why Civilizations Self-Destruct** by Elmer Pendell. To survive, we must reverse the lethal process that increases human quantity while reducing human quality. In the precivilized states of natural selection produced a superior variety of human whose intelligence was eventually channeled into building an advanced social order that protected instead of eliminated the unfit. When the protected outnumber the predators, civilization begins to die. If we follow Dr. Pendell’s advice, we could be the first to successfully defy this apparently inexorable life-and-death cycle. 196 pages, index. Hardcover, $12.

- **Best of Instauration** in three volumes, 1976, 1977 and 1978. A choice selection of the contents of the first three years of *Instauration*, Wilmot Robertson’s monthly magazine. The original page size has been retained, meaning that the 116 pages of each book represent at least 348 ordinary book pages. Virtual encyclopedias of revisionist history, the three volumes look at the world from a Majority perspective. Brilliant, factual writing on philosophy, history, literature and current events that can’t be found in any other contemporary publication. Softcover, 1976, 1977, $10 each; 1978, $12.

- **The Mediator** by Richard Swartzbaugh. The author, an assistant professor of anthropology, explains how and why the mediators and go-betweeners who abound in America exert great influence over our daily lives. The book’s subtitle could easily be “The Unmasking of a Powerful Establishment.” Hardcover, 133 pages, index, $5.95.

- **The Might of the West** by Lawrence Brown. The best of all possible antidotes to Spengler, the author, a scholar-engineer, says Western civilization did not begin in Greece but in medieval Europe. The Renaissance was a time of reaction, interrupting Western progress by turning it backward to Athens and Rome. The eternal conflict with the Levantine culture rebuffed the West’s scientific and cultural growth with dogma and irrationalism. The wealth of information in this epochal study conclusively demonstrates there was more light than darkness in the Dark Ages. Hardcover, 549 pages, index, $20.

- **Camp of the Saints** by Jean Raspail. Ghastly, shuddering, mind-reeling scenario of what is in store for the Occident if liberalism and apathy continue to weaken the Western will to survive. The author, a bitterly sardonic Frenchman, charts the dying convulsions of France from the day a million famished Third Worlders pile on a fleet of leaking hulks in Calcutta and sail off to the land of milk and honey. The first great uncompromising novel of modern times. Originally published by Scribner’s. New edition with new preface by the author. Hardcover, 311 pages, $15; softcover, $8.

- **The French Revolution in San Domingo** by Lothrop Stoddard. A grim, frightening, lucid account of the step-by-step destruction of white civilization in the richest island in the New World. By the time the negro emperors had taken over, every single white with both black and white children, had either fled or been massacred. The end result was Haiti, today the poorest and most rundown of the West Indian softs. Softcover, 410 pages, $10.

- **The Ideal and Destiny** by Richard McCulloch. An 11th-hour philosophy for racial salvation. Championing the cause of Northern European man, this extremely intelligent diagnosis and prognosis of our time tells us how to rise above the nationalisms, internationalism, and religious and class sectarianism that have broken us asunder. To ensure our resurgence, the author has developed new and constructive ways of understanding history, economics, sociology, anthropology, culture and aesthetics, especially the latter. He launches a bitter attack on altruism, which he defines as the quest for nonexistence, and on the "metaphysical significance" given by the media to all the failed programs and programmes of society. Hardcover, 534 pages, $20.

- **Destiny of Angels** by Richard McCulloch. Companion volume to the above. The author puts particular emphasis on ways and means to save Northern Europeans and their descendants overseas from racial suicide. His thesis is that it will be a great historic tragedy if Nordics do not fulfill their enormous evolutionary potential. A pageant to the incomparable talents and accomplishments of the most aesthetic race. Hardcover, 314 pages, illustrated, $20.

- **A New Theory of Human Evolution** by Sir Arthur Keith. The greatest modern anthropologist is almost unknown to the American reading public, and the media monopolists are unabashed. This is Keith's major work and contains the principal threads of his ideas about evolution and the constructive role played by nationalism and prejudice in race building and genetic progress. No book offers a more penetrating rebuttal to the Boas school of anthropology, whose unfounded assertions about racial equality have dominated Western thought for most of this century. Hardcover, 451 pages, $18.

- **The Crowd** by Gustave Le Bon. The great, half-forgotten French prophet jumped the gun on Freud, Ortega and Pareto in a study of the popular mind. Crowds, wrote Le Bon, do things which individuals would never do. They have a personality of their own, a distinctively personal, and they are the uniquely offspring of mass democracy. Le Bon's low opinion of historians, his well-grounded dismissals of religion and his high opinion of race are refreshingly controversy-free and will stimulate you. Softcover, 207 pages, $8.95.

- **A New Morality from Science** by Raymond B. Cattell. An internationally prominent social scientist rejects liberalism and rational leveling in a profound and challenging work that searches for new ethical values from the domain of science. The author's eminently sensible proposals for a new evolutionary ethic based on behavioral genetics rather than on religious, liberal or Marxist dogma have been greeted by book reviewers with almost total silence. Published in 1973 by Pergamon Press, Softcover, 482 pages, indexed, $17.

- **Race** by Dr. John R. Baker. The world-renowned Oxford biologist has assembled almost all the available physiological and historical evidence to prove that races differ mentally as well as physically. It provides the reader with the exciting feeling that he has discovered a whole new fund of knowledge, almost a secret knowledge, since the facts have been kept from him for so long. There are many keys to history -- Toynbee's, Spengler's, Marx's, Freud's -- but surely it is time to have a book that may well provide the master key. Softcover reprint of the 1974 Oxford University Press edition, 625 pages, profusely illustrated, bibliography, index, $20.

- **Toward a New Science of Man** by Robert Lenski. A constitutional psychologist explores the biological forces which underlie white despair and disintegration. The search for behavioral causes of decline uncovers many little-known relationships: eye color and reactivity; social mobility and fertility; somatotype and personality; human beauty and symmetry. Quotations from 500 great writers on Nationalism and Individualism, Domains, Sexual Selection, Migration, the Nature of Conflict, and "all the ideologically hot subjects of our day." Softcover, 251 pages, illustrated, index, $10.
